Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 19-24, 26 and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by Sorrells.

In regard to claim 19, a cleaning product comprising: a waste receptacle (12) for holding a discarded fluid separated from the applicator; a fluid reservoir (15) for holding a clean fluid (35); an applicator bath (19) for holding a rinse fluid for transferring to the applicator by rinsing, the bath having a fill mode and an empty mode; the bath in use in the fill mode holding the rinse fluid for rinsing the applicator; the bath in use in the empty mode discarding the rinse fluid to the waste receptacle; the bath being switchable between the fill mode and the empty mode as needed to control contamination of the rinse fluid; a fluid dispenser (26) for dispensing the clean fluid from the reservoir to the bath; the dispenser being fluid-wise connected to the reservoir; the dispenser in use dispensing the clean fluid from the reservoir to the bath as needed to maintain the rinse fluid in the bath within a predetermined volumetric range (see col. 2, lines 25-47); and the product in use being configured so that the fluid separated from the applicator can be discarded directly to the waste receptacle without passing through the applicator

bath. Reservoir (15) is capable of being removed and liquid therefrom directly poured into the receptacle (12).

In regard to claim 20, inasmuch structure that is defined by a "barrier", the valve of dispenser (26) meets the claim limitation.

In regard to claims 21, 22, 26 and 27, rotatable handle 25 meets the claim limitation of an "actuator", since the handle can be operated by hand and capable of being operated by foot.

In regard to claims 23 and 24, see the positioning of the receptacle, reservoir and bath in the Figures.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 37 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sorrells.

The Sorrells reference discloses the invention substantially as claimed (discussed supra), but doesn't disclose having a closed-top reservoir. It would have been an obvious matter of design choice to employ a closed top to the Sorrells

Art Unit: 3751

reservoir, since applicant has not disclosed that a closed top solves any stated problem and it appears that the invention would perform equally with or without a closed top.

Allowable Subject Matter

Claims 25, 28-36 and 38 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art pertains to similar structure as the Applicant's device.
